Professionals Amid COVID

What impact is COVID having on emotional intelligence?

In the next slide, you will see the summary of the data collected from the **1,356 EQ-i** reports I have debriefed with clients from a variety of businesses and professions since 2008.

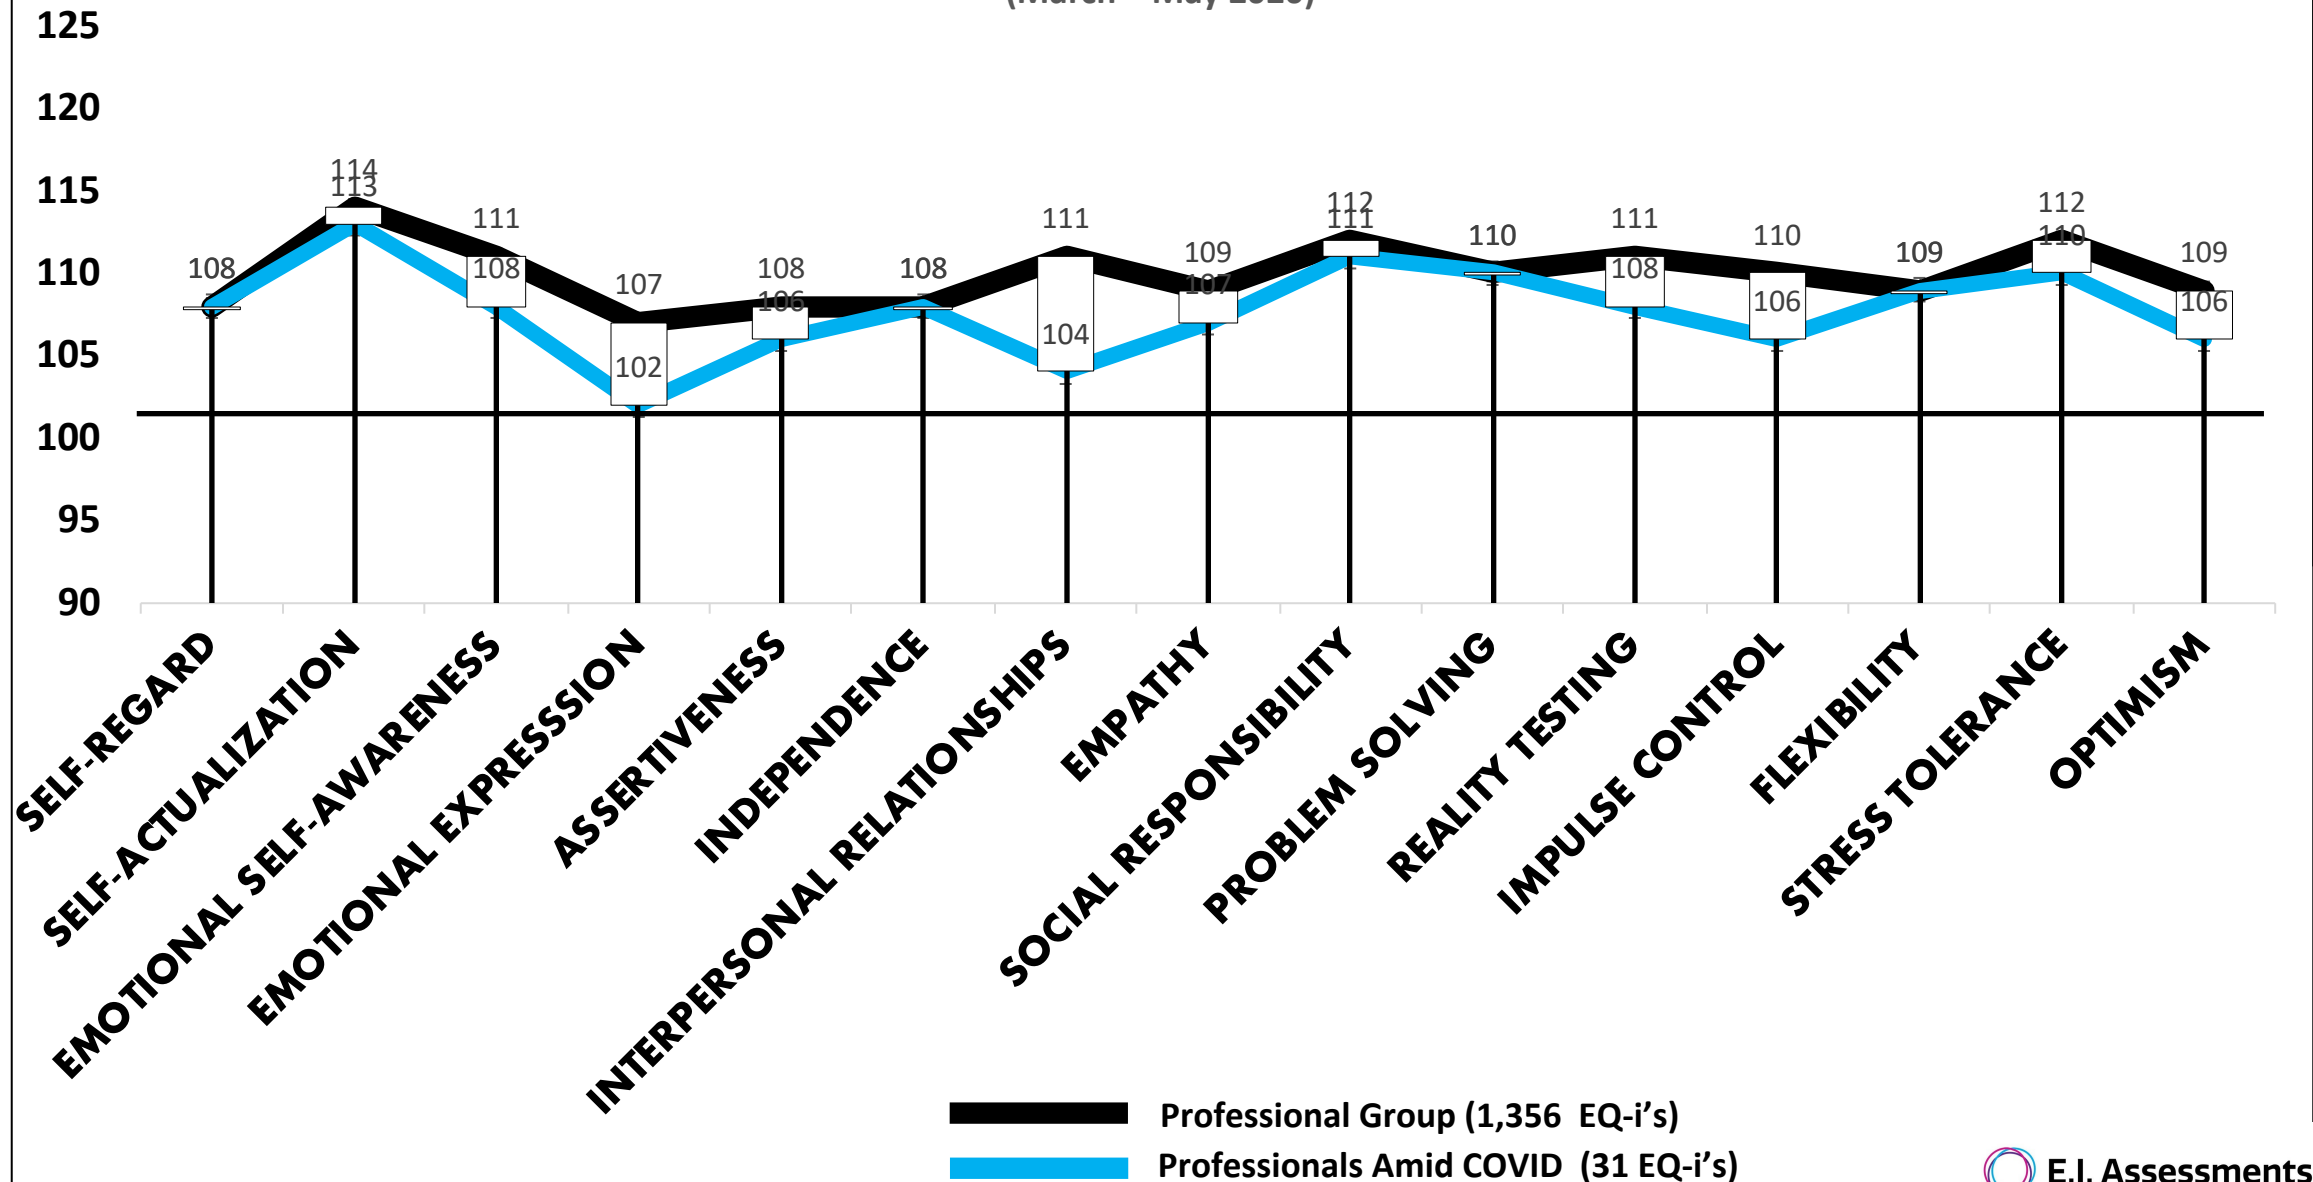

You will also see a comparison with the **31 EQ-i** reports I have debriefed between March and May, 2020. This group, like the larger group, is EQ-i data from corporate staff members, managers, directors, vice presidents as well as non-profit executives.
